SUMMARY

B.Tech Computer Science student (3rd year) with hands-on experience in Full-Stack Development, Machine Learning, and Software Testing. Proven ability to design and deploy end-to-end ML pipelines, develop production-ready web applications, and optimize system performance. Seeking Full-Stack Developer or ML Engineer role to contribute technical excellence and drive measurable business impact.

TECHNICAL SKILLS

Programming Languages: Python, C, C++, SQL, JavaScript (basic)

Frontend: React.js, Streamlit, HTML/CSS, UI/UX

Libraries & Tools: Git/GitHub, Docker, ChromaDB

Computer Science Fundamentals: Data Structures and Algorithms, Object-Oriented Programming, Relational Database Management Systems

Backend: FastAPI, Node.js, Database design

Databases: MySQL, MongoDB

PROJECTS

Clause Guard

AI/NLP Project Generative AI Project

Python, FastAPI, React, LangChain, ChromaDB, OpenAI API

- Built ClauseGuard, an AI-powered lease agreement analyzer using Retrieval-Augmented Generation (RAG), GPT-4/Claude API, and ChromaDB vector database to classify rental clauses as Fair, Unfair, or Illegal with jurisdiction-aware legal statute retrieval.
- Engineered an end-to-end NLP pipeline using Sentence Transformers and LLM prompt engineering to process and semantically classify 10+ lease clause types, achieving 85 percent + accuracy with Tesseract OCR fallback for scanned PDF and deployed it on Vercel and Render.

News Summarizer

Deep Learning Project

Python, TensorFlow,

- Built an AI-powered news summarizer for exam prep by integrating Hugging Face transformers with the GNews API, achieving a summarization accuracy of [ROUGE score: 0.40–0.55] across [500+] daily articles processed.
- Deployed an interactive Streamlit web app used by students by designing an end-to-end pipeline that auto-generates summaries, explanations, and MCQs, reducing manual study time.

Enterprise Workflow Inefficiency Analyzer

Data Science Project

Python, FastAPI, React, Scikit-learn

- Built an end-to-end workflow analytics platform that processes enterprise CSV logs, detects bottlenecks across 8 departments, and visualizes inefficiency scores on a live React dashboard deployed on Vercel and Render.
- Trained a Random Forest Classifier on 2,342 synthetic workflow records with 14 engineered features including step duration ratios and delay flags, achieving 84 percent accuracy in predicting workflow delays and make it consumer centric and end-user focused.

Book Recommendation System

Natural Language Processing

Python, Flask, NLTK, Hugging Face

- Developed a book recommendation engine with suggestion relevance by implementing collaborative filtering on a dataset of [10,000+] books, resulting in personalized real-time recommendations served through a Streamlit UI.
- Reduced model load time by optimizing data preprocessing pipelines with pandas and using joblib serialization, improving app responsiveness for end users.

Research Paper

Landslide Susceptibility Mapping in Himalayan Regions

Python, Scikit-learn, Random Forest, Google Earth Engine

- Developed a Random Forest classifier for landslide susceptibility mapping across Uttarakhand and Himachal Pradesh using Google Earth Engine, Scikit-learn, and multi-source remote sensing data (SRTM DEM, Sentinel-2, CHIRPS), achieving AUC-ROC of 0.896 and 83percent test accuracy on geospatial feature sets.
- Built an end-to-end cloud-based geospatial ML pipeline integrating topographic, hydrological, and environmental conditioning factors for pixel-wise risk classification.

EXPERIENCE

Software Intern

Jun 2025- Aug 2025

Total Shift Left

- Participated in the full software development lifecycle (SDLC), from requirements review through development, system testing, and release for ERP/CRM modules.
- Executed system integration testing and documented test cases, ensuring code quality in Microsoft Dynamics 365
- Built a testing automation project from scratch by scripting test scenarios in VSCode, resulting in improved system reliability for the development team.

Sales and Marketing Intern

Aug 2025- Sep 2025

Wedd.Ai

- Engaged in content creation, aiding sales outreach efforts, and facilitating marketing initiatives.
- Created 12+ pieces of marketing content (articles, product demos, blog posts) achieving increase in lead engagement

Intern

Aug 2024- Sep 2024

Smollan

- Collaborated with cross-functional team members to craft engaging visual content for Google product showcases.
- Proficiently oversaw recording and management of presentations and sheets and collaborated with cross-functional teams to deliver AI solutions.

Intern

May 2024- Aug 2024

Vatika Ltd.

- Maintained accurate records of all activities performed throughout internship period.
- Utilized document management system to organize company files, keeping up-to-date and easily accessible data.

EDUCATION

Manipal University Jaipur

B.Tech – Computer Science (Data Science)

2023 - 2027

Amity International School, Saket

CBSE Certified, Science Stream (PCM)

2015 – 2019

CERTIFICATIONS

- Learn C: Pointers and Memory – Codecademy (Online) Certificate: <https://surli.cc/cfscscs>
- Foundations: Data, Data, Everywhere – Google, Coursera (Online) Certificate: <https://surl.li/cdoxss>
- Generative AI Workshop - IIT Delhi
- Artificial Intelligence Workshop - IIT Delhi
- Technology Job Simulation - Deloitte (Virtual)- <https://url-shortener.me/GD0G>
